

Malcolm Kerby

Malcolm was the main driver in highlighting the plight of Happisburgh to the authorities and obtaining a portion of the Pathfinder fund that allowed those at risk from losing their properties to move before their homes were swallowed by the sea.

The funds were also used to create a new car park and playground and a new access to the beach.

" When we won the Pathfinder money, the Government Cost/Benefit calculation was 1:1 but it is now 12:1 which means that the residents of Happisburgh are now left high and dry without any hope of financial help"

"The coast is eroding faster than the Government can think"

"There are 16.9m people in the "coastal zone" in the UK and the Government is trying to convince people that it doing more to help when in fact it is doing less"

"Coastal erosion accounts for only 9% of the flood and coastal protection budget"
